MINISTRY OF WORKS, PRODUCTION AND SUPPLY

CENTRAL BOILERS BOARD

New Delhi, the 15th November 1951

S.R.O. 1824.—In exercise of the powers conferred by section 28 of the Indian Boilers Act, 1923 (V of 1923), the Central Boilers Board directs that the following amendments shall be made in the Indian Boiler Regulations, 1950, the same having been previously published as required by sub-section (1) of section 31 of the said Act, namely:—

For the table of Maximum working pressure annexed to Clause (a) of regulation 510 of the said Regulations the following shall be substituted namely:—

- (1) Smooth ordinary tubes—325 lb. 1 sq. in.
- (2) Smooth ordinary strengthened tubes—375 lb./sq. in.
- (3) Smooth tubes with ring stays—475 lb./sq. in.
- (4) Gill tubes of approved design—650 lb./sq. in.

[No. M/BL-304(52).]

S.R.O. 1825.—The following draft of certain amendments to the Indian Boiler Regulations, 1950, which the Central Boilers Board propose to make in exercise of the power conferred by section 28 of the Indian Boilers Act, 1923 (V of 1923), is published as required by sub-section (1) of section 31 of the said Act, for information of all persons likely to be affected thereby and notice is thereby given that the said draft will be taken into consideration on or after the 31st December 1951.

Any objections or suggestions which may be received from any person with respect to the said draft before the date specified will be considered by the Central Boilers Board. Such objections or suggestions should be addressed to the Secretary, Central Boilers Board, Ministry of Works, Production and Supply, North Block, New Delhi.

Draft Amendments

For regulations 275, 276, 277 and 278 of the said Regulations, and for the table and figures referred to therein, the following shall be substituted, namely:—

275. Shape of Dished End Plate.—When an endplate is dished to semi-ellipsoidal, partial spherical or hemispherical form, it shall comply with the following: (See Fig. 23).

(a) For ends of partial spherical form the inside radius of dishing R shall not be greater than the outside diameter D of the end plate and the inside corner radius r shall not be less than four times the thickness of the end plate or $2\frac{1}{2}$ inches or 12.5 per cent. of the inside diameter of shell, whichever is the greatest.

(b) For ends of semi-ellipsoidal form the ratio of the major axis to the minor is shall not be greater than 2.

- 276. *General*.—The thickness T specified in equation 74 of Regulation 278 is the thickness of the end plate after manufacture and is applicable over the whole area of the end plate up to the point where, for ends of partially spherical shape, the dishing radius joins the corner radius; from this point a gradual thinning is permissible up to a maximum of 10 per cent. of the thickness T at the point where the corner radius joins the straight portion of the flanged end plate. A similar gradual thinning is permissible for end plates of semi-ellipsoidal shape. This permissible reduction in thickness applies also to the flange for the manhole opening. In no case, however, when the end plate is butt welded to the drum shell, shall the thickness of the edge of the flange for connection to the shell be less than the thickness of an unpierced seamless shell of the same diameter and material, determined by equation 72.

277. *End Plate with Manhole*.—When an end plate has a flanged-in-manhole the depth of the flange forming the access opening measured from the outer surface of the plate at the minor axis of the opening shall be not less than \sqrt{TXW}

Where T=Thickness of the end plate in inches;

W=Minor axis of the manhole in inches.

NOTE.—The corner radius of the manhole flange r_m shall be not less than 1" (See Fig. 23).

278. (a) *End Plate subject To Pressure On the Concave Side*.—The maximum working pressure of unstayed Dished End Plates subject to pressure on the concave side shall be determined by the following formula:

$$WP = \frac{2f(T-O.1)}{DFK} \quad (\text{Eqn. 74})$$

Where WP=Working Pressure in lb./sq. in.

f=Permissible stress in lb./sq. in. at working metal temperature of the drum end plate. (See table below).

T=Thickness of the end plate in inches.

D=Outside diameter of the end plate in inches.

F=1 for end plates without holes, or having only reinforced holes, or having unreinforced widely spaced holes not exceeding four times the plate thickness or $2\frac{1}{2}$ inches, whichever is the less.

=1.15 for end plates having a central flanged manhole or hand hole (complying with Eqn. 73).

=a constant whose value is more than 1.15 for end plates having unreinforced holes of dimensions greater than $2\frac{1}{2}$ " or four times the thickness of the plate.

=End plates should not have large unreinforced holes, eccentric flanged manholes or hand holes, wherever practicable and in those cases the Chief Inspector of Boilers may in his discretion use such values of F as would meet the circumstances, dependent upon the size, shape and position of these openings in the end plate.

K=A factor dependent upon the ratio $\frac{h}{D}$ where h is the external height, and generally obtained from the curve shown in Fig. 22.

In no case shall K be taken as less than $1.15 \frac{R}{D}$ or $0.12 \frac{D}{r}$

(See Fig. 23).

NOTE 1.—The external height of dishing h may, for ends of partial spherical form, be determined as follows: (See Fig. 23):—

$$h = R_s = \sqrt{\frac{(R_s - \frac{D}{2}) \times R_s + \frac{D}{2} - 2r_s}{2}} \quad (\text{Eqn. 75})$$

NOTE 2.—Where the above rules are applied to small drum ends with manhole openings, the dimensions "r" and " " (See Fig. 23) apply only to the section of the end containing the minor axis of the opening, i.e. "r" and " r_m " need not apply throughout the whole periphery of such ends.

New Delhi, the 17th November 1951

S.R.O. 1826.—The following draft of certain amendments to the Indian Boiler Regulations, 1950, which the Central Boilers Board propose to make in exercise of the power conferred by section 28 of the Indian Boilers Act, 1923 (V of 1923), is published as required by sub-section (1) of section 31 of the said Act, for information of all persons likely to be affected thereby and notice is hereby given that the said draft will be taken into consideration on or after the 31st December 1951.

Any objections or suggestions which may be received from any person with respect to the said draft before the date specified will be considered by the Central Boilers Board. Such objections or suggestions should be addressed to the Secretary, Central Boilers Board, Ministry of Works, Production and Supply, North Block, New Delhi.

Draft Amendment.

For Clause (a) of regulation 123 of the said Regulations, the following clause shall be substituted, namely:—

- “(a) The furnaces of vertical boilers may be constructed in one or more lengthwise sections, each section being rolled from one plate to a full circle. In such cases, the component sections may be jointed circumferentially by electrically butt-welding or riveting. Where welded they shall be stress relieved.”

[No. M/BL-304(58).]

S.R.O. 1827.—The following draft of a further amendment to the Indian Boiler Regulations, 1950, which the Central Boilers Board propose to make in exercise of the power conferred by section 28 of the Indian Boilers Act, 1923 (V of 1923), is published as required by sub-section (1) of section 31 of the said Act, for the information of all persons likely to be affected thereby, and notice is hereby given that the draft will be taken into consideration on or after the 31st December 1951.

Any objection or suggestion which may be received from any person with respect to the said draft before the date specified will be considered by the Central Boilers Board. Such objections or suggestions should be addressed to the Secretary, Central Boilers Board, Ministry of Works, Production and Supply, North Block, New Delhi.

Draft Amendment

For the table annexed to clause (a) of regulation 49 of the said Regulations, the following table shall be substituted, namely:—

Test pieces	Ultimate tensile strength tons/sq. in		Minimum elongation, per cent.			
			On 8 inch		On 2 inch.
